CAREER OBJECTIVE

AI graduate with working knowledge of Python, Machine Learning, NLP, and databases (MySQL, MongoDB), seeking an entry-level IT role to contribute to application development and data-driven solutions while continuously improving technical skills.

EDUCATION

Aditya Degree College, Affiliated to Andhra University
B.Sc. in Artificial Intelligence
CGPA: 7.50

Visakhapatnam, India
2023 - 2026

SKILLS

Programming Languages: Python, C, Java
Tools: Git
Databases: SQL

PROJECTS

1. AI Resume Analyzer

- Developed a full-stack web application using Flask and Python to evaluate the compatibility between candidate resumes and specific job descriptions.
- Engineered a custom Natural Language Processing (NLP) pipeline using the spaCy library for text preprocessing, lemmatization, and Named Entity Recognition (NER).
- Implemented an Applicant Tracking System (ATS) scoring algorithm utilizing Scikit-Learn's `TfidfVectorizer` and Cosine Similarity to calculate semantic document distances.
- Built a responsive, glassmorphism-themed frontend with HTML, CSS, and JavaScript, featuring drag-and-drop PDF file uploading and dynamic data visualization.

2. IPL Score Prediction

- Developed an interactive dashboard that allows users to input live cricket match details and instantly get predictions for the final score and win probability.
- Used Python and historical IPL data to train AI models (Random Forest) that accurately forecast match outcomes based on venues, teams, and current score.
- Designed a modern, user-friendly interface using HTML, CSS, and JavaScript, featuring dynamic charts (Chart.js) to display predicted score ranges visually.
- Set up a Python web server (Flask) to instantly process user inputs from the webpage and send back live AI predictions without reloading the screen.
- Python, Machine Learning (Scikit-Learn, Pandas), JavaScript, HTML/CSS, Flask, Chart.js.

CERTIFICATIONS

- Python Essentials - Cisco Networking Academy
- C Programming Language - Cisco Networking Academy
- English communication - (MEPro – Pearson)

ACHIEVEMENTS

- Won 1st in a Debugging Competition focused on identifying and fixing logical and runtime errors.
